

CB Antenna Mounts C5 and C6 Corvettes

CB Antenna mounting plates that allow you to quickly mount and dismount your CB antenna and not have anything show when the CB is not in use are available. The mount consists of an Aluminum plate that mounts behind the rear license plate using existing license plate screws. The second removable plate is 304 Stainless Steel. Four slots engage 4 stainless steel screws in the aluminum to hold it on when in use and allow quick removal when not in use. The only difference between the C5 and C6 is the length of stainless plate on the C5 is a little more than an inch longer for the antenna to clear the body on the C5. Price is \$45.00
